- C/C++ Dev

- OCaml

- 3D Animation: Cinema 4D

- Video production: Premiere/After Effect

- Document production: LaTeX

- Cantonese/Chinese/French/English

- Adobe Edge Animation

# 3   Study Exp

While learning in France, we studied the C programming language, OCaml, CSS, PHP, Java, Javascript, etc.

In France, we always finish our job on Linux (Debian).

I used to use C#.Net to develop desktop applications.

And also we've been trained to develop a web page using PHP and MySQL.

I love developing web pages or desktop apps.

# 4   Work Exp

While studying in France, I used to develop a page for France Express (using PHP and GoDaddy).

# 5   Self-evaluation

I love new technologies, and I always want to have a try. Though our university didn't ask us to learn C++, LaTeX, Ajax, etc, but I learned them. And I always try to solve a problem in different ways.
